The interview of the moment.... Julien Besson!

What is your position and what are your main duties?

O&M manager: trying to set up a peaceful and agile organization, working as a team, during the O&M phase to optimize the costs while meeting the commitments towards the State and the various stakeholders.

If possible, I will also try to ensure that some wind spirit poetry spirit remains in this world of steel and blades once we reach Commercial Operation Date.

What did you do before coming here?

Gas infrastructures (storage), Operations & Maintenance. Managing the negative growth of gas consumption (and storage capacity) in France and thus participating to the reduction of CO2 emissions.

What do you like in your company?

Open-mindedness and ability to always welcome a new comer in the happy family.

What is your best achievement since you arrived?

I did survive 3 BP update... Hope it will continue.

Something personal about you?

This answer can not be shared in a professional paper.
